

BI for Healthcare Organizations

Reach higher performance with a global, clear view of your data

WE PROVIDE BI HEALTHCARE ANALYTICS

This data analytics business tool enables you to integrate and blend different data components (e.g. finance, operations, and client management etc.), visualise them in the form of analysis and dashboards and explore them to discover trends and patterns through specific KPI's.

THE ANALYTICS:

- Hospital Financials
- Customer Spending Patterns
- Performance Reporting
- Patients analysis
- Income analysis by dr. activity
- Department analysis
- GESY analysis

THE GOALS:

- Create your Business Intelligence solution for reporting & performance analysis
- Facilitate the improvement of your organization's information management
- Enable a holistic overview of your business processes for improvements and further growth
- Allow the right people to receive the right information
